

Part No: 027381

Marine Stainless Steel Rail-mount Knuckle Adjustable Antenna Mount

A heavy duty adjustable antenna mount that articulates for horizontal or vertical mounting rails (**22-26mm diameter**). It is constructed entirely of corrosion resistant, non-ferrous materials, ideally suited to shipboard and fixed station applications requiring non-magnetic antennas. This mount is cast stainless steel and mirror polished. It is threaded for all standard 1" x 14tpi antennas and has a hole to allow the wire to pass through the threaded portion.

Application

Shipboard and fixed station applications. By lifting the Handle toward the vertical will disengage the V-grooves and allows you to swivel the Antenna to the desired angle. To lock the fitting, bring the Handle back down to the Horizontal.

Consult the **Marine Antenna Installation Instructions** supplied with your Marine Antenna for the proper procedure to follow in the installation and use of your Marine Antenna.

Features

- ✓ Stainless steel construction
- ✓ Accepts all antennas with 1" - 14 tpi threads
- ✓ Stainless steel hardware
- ✓ Positive cam lockdown handle
- ✓ Rail mount vertically or horizontally
- ✓ 9/32" (~7mm) access hole for cable routing
- ✓ Supplied already assembled, ready to use

Specifications

Max Length:	100mm	Gross Weight:	565g
Base Dimensions:	47x66mm	Construction:	Stainless Steel

Packaging

1 per Poly Bag inc Header: 230x110x65mm
Box 20: G.W. 12.3kg: 240x240x250mm

Warranty

12 months (Please refer to [Benelec Terms & Conditions](#))
